1 Tender Overview

1.1 About Asyad Group SAOC

The Sultanate of Oman has commenced activities to consolidate its various government-owned companies into several holding companies grouped by type of business or industrial activity. Logistics has been identified as one of those key focus industries.

Asyad Group has been set up to consolidate the government owned Logistics companies (except the air sector). Asyad has a mandate to develop Oman's Logistics capabilities and to foster investment opportunities in the Logistics sector.

Oman plans to establish itself as a premier global Logistics hub by taking advantage of its geographic location at the cross roads of trade midway between Asia and Europe, along with connections to East Africa, the Indian Subcontinent and Iran. By using overland highways and rail service Oman will become a natural gateway into the GCC Countries avoiding the politically sensitive Straits of Hormuz and reducing the distance ocean carriers must travel to reach Ports in the Arabian Gulf.

Asyad has also been tasked with implementing the National Logistics Strategy (NLS), formerly known as Sultanate of Oman Logistics Strategy (SOLS).

The successful implementation of NLS will enable Logistics to become a major contributor to the Oman economy, facilitating economic diversification, creating significant new employment opportunities and delivering improved performance rankings in key world operating indices. Thus the result of NLS will make Oman a major global Logistics hub, leveraging its geographical advantages along with its significant recent investment in its Logistics infrastructure.

1.2 Description of Scope of Service.

Inspection and lifting load validation provide mandatory safety, compliance, and performance verification for lifting gear, Lifting Equipment, structural inspection, load test requirements, governed by Accredited Local and International Bodies, which mandate testing for equipment and lifting Gears requirements.

- Lifting equipment and lifting gears are critical to daily Load Lifting operations at Port Sultan Qaboos (PSQ) and Port of Suwaiq (PSU). Due to heavy use and harsh operating conditions, these assets must be regularly inspected and load tested to ensure they remain safe and fit for purpose.
- International and Omani regulations require lifting equipment to be inspected by Accredited Company, with proof-load testing typically conducted at 100%–125% of the Safe Working Load (SWL). Periodic certification, reporting, and color coding are mandatory to confirm compliance and safe operation.
- Periodic inspection and Validation program ensures regulatory compliance, reduces lifting-related risks, protects personnel and assets, and supports safe and reliable port operations.
